

Subsequent payments

The Applicant(s) / contracting partner(s) shall be entitled, without prior notice, to make individual additional payments by bank transfer or standing order with a minimum amount of 100 CHF / EUR at any time.

Optional: I/we intend to make acquisitions on a voluntary basis in the following amounts:

Amount of additional payment	Starting from	Frequency of payment
------------------------------	---------------	----------------------

Future automatic increase in the target investment amount (TIA)

If additional payments exceed the TIA by more than 5% gold, the TIA will be automatically increased by the required number of ounces, in steps of 5 ounces each time.

With each automatic TIA increase, the agreed commission of a standard 3.5 % is charged, or from 1/2 talent 1.5 %. The commission in CHF / EUR is calculated on the basis of the gold price per oz. in CHF / EUR on the next trading date after the incoming payment has been booked on the G-Deposito portal and the increase has been processed.

Processing will take place within two working days and includes a check in accordance with the requirements of the Money Laundering Act (GwG). Until all the necessary information has been provided and documents have been filled in completely and correctly, the processing of the orders may not be carried out. Please note that in the case of a total TIA or a total commitment including all BB products of more than CHF 100,000, in addition to the legally required Form K, Form E must also be completed to provide supplementary information.

Pre-contractual information / note on exchange rate risks

Gold granules are a valuable raw material that is traded on stock exchanges worldwide. This means that the price of gold on the G-Deposito account is also dependent on the development of the stock exchange price. Moreover, the wholesale premiums for the physical purchase of the commodity also fluctuate and can rise by several percent in extreme market situations. Furthermore, the USD / CHF, USD / EUR, CHF / EUR exchange rates have a significant influence on prices, depending on the currency in which trading takes place. Even though gold has an intrinsic value, which represents a natural price floor, its price can fall significantly below the purchase price. Price fluctuations are greater for silver than for gold. Selling gold at an inopportune time can thus result in substantial losses. The purchase of gold, including gold granules in the G-Deposito, should be associated with a long-term investment horizon. BB Wertmetall AG, its partners and brokers expressly do not make any forecasts as to the price development of gold in the short or medium term.

Declaration of the Applicant(s) / contracting partner(s)

I / we have read and agree to the basic documents of G-Deposito General Terms and Conditions as of 01/2023 (Special Terms and Conditions G-Deposito, General Terms and Conditions, Terms and Conditions of Ordering, Delivery and Payment, Terms and Conditions of Contract for Collective Safekeeping and Information on Data Processing) for this contract, as well as the data protection declaration at <https://bb-wertmetall.ch/datenschutz>, the exclusion of revocation and a copy of this application. I/we agree to the transmission of contractual information to my/our email address(es) and telephone number(s).

Exclusion from revocation

A right of revocation does not exist for contracts for the delivery of goods whose price depends on fluctuations on the raw material and foreign exchange market and on which the entrepreneur has no influence. With regard to the precious metal sold by BB Wertmetall AG under this contract, there is therefore no right of revocation.
